Kristin A. Camenga

Kristin Camenga is an Associate Professor of Mathematics at Juniata College in Huntingdon, PA, where she has been teaching since 2016. Prior to joining the faculty at Juniata, she was an Associate Professor and Department Chair of Mathematics at Houghton College, where she taught from 2006-20015. She also taught part-time for one year at Penn State-Altoona. She received her B.A. in Mathematics from St. Olaf College and taught high school mathematics in Delano, MN for two years before returning to school at Cornell University and earning her M.S. in Education and Ph.D. in Mathematics. She studied in Budapest in 1998 on a Fulbright Scholarship.

Kristin teaches a variety of lower level and upper level mathematics classes, ranging from the Heart of Mathematics and Calculus I to Combinatorics and Complex Analysis. She earned her Ph.D. in geometric combinatorics and currently does mathematics research in linear algebra. She also has strong interest scholarship of teaching and learning and connecting the college mathematics curriculum to K-12 mathematics. Kristin was named a Project NExT Fellow in 2007-2008 and currently serves on the MAA Committee on Faculty Development. She is a member of the Pro Mathematica Arte Council, which serves as an advisory board to the Pro Mathematica Arte Board, which oversees the Budapest Semester in Mathematics and Mathematics Education programs.

Kristin's first contact with the ACMS was attending a dinner at the Joint Mathematics Meeting sometime in the mid-2000s. Relationships with others in the ACMS community have been a core part of her national math conference experience, providing a larger sense of belonging and a network for information about the profession and teaching. Attending the biennial ACMS conferences has strengthened these relationships. She is also interested in collaborating with others at non-Christian colleges to consider how they can better embody the gospel in their workplaces.

Kristin and her husband Andrew live in Woodbury, PA with their two children Elisa and Annika. They are members at the German Seventh Day Baptist Church in Salemville, PA, where Andrew is the pastor. Kristin tries to teach a math lesson in each of her kids' elementary school classrooms at least once a year. She enjoys reading, playing piano and singing, and crocheting, though she spends most of her time trying to keep up with her kids' latest projects!

Dave Klanderman

Dave Klanderman is a Professor of Mathematics Education at Calvin University (currently called Calvin College until July 10, 2019). He received his B.S. in mathematics from Calvin College, the M.Ed. in mathematics education from Syracuse University, the M.A. in mathematics and the Ph.D. in mathematics education from Northern Illinois University.

Currently, Dave teaches both content and methods courses for those planning to teach mathematics at the elementary, middle, and high school levels. He also serves as a field supervisor for secondary mathematics student teachers. Before coming to Calvin, he taught a wide variety of mathematics courses, including introductory statistics, multivariable calculus, advanced courses in abstract algebra and geometry, and the senior capstone seminar. A member of ACMS since 1991, Dave has attended a total of 12 of the biennial conferences and has served as a speaker at nine of these conferences. Dave was a contributing author to the *Mathematics in a Postmodern Age: A Christian Perspective* book. He has served on the ACMS board since 2015, including a two-year term as vice president. He begins a two-year term as president on June 1, 2019.

Dave lives in Grand Rapids, Michigan with his wife Barbara. They are members of Eastern Avenue Christian Reformed Church in Grand Rapids where Dave and his wife sing in the adult choir. Dave and Barbara have a daughter Sarah, a Ph.D. student in mathematics at Michigan State University who has attended four ACMS conferences (and spoken at two of them), and a son William who graduates from a mechanical engineering program at Geneva College in May 2019. As hobbies, Dave enjoys detective fiction, Scrabble, walking, and golf.

Hi Bob,

My apologies for not getting this to you earlier. Thank you for the reminder. My statement is below.

Cheers,
Bryant

Bryant Mathews is a Professor of Mathematics at Azusa Pacific University where he has been teaching since 2009. He received the A.A. in Liberal Arts from Simon's Rock College, the B.A. in Mathematics from Harvard University, and the M.A. and Ph.D. in Mathematics from UCLA. His research interests include algebraic geometry, tropical linear algebra, graph labeling, and voting theory.

At Azusa Pacific University, Bryant has chaired the Department of Mathematics, Physics, and Statistics since 2015. Prior to that, he chaired the Undergraduate Program Review Committee and served as a Teaching/Learning Fellow. He received the University Leadership Award in 2018 for his work revising the mathematics placement process and the developmental mathematics curriculum.

Bryant has attended five biennial conferences of the ACMS and is completing his first term on the Board. He has greatly appreciated the insights and fellowship of colleagues in the organization and looks forward to hosting the 2021 conference at Azusa Pacific.

Bryant lives in Pasadena with his wife, Margaret, and their children Elise and Andrew. They attend church at Fellowship Pasadena. Bryant serves on the District Advisory Council of the Pasadena Unified School District and coaches his daughter's soccer team.

Dear Bryant and Vic,

Victor Norman

Victor Norman is an Associate Professor of Computer Science at Calvin College, Grand Rapids, MI. He has been teaching at Calvin since 2009. Previously, he was a software engineer at various firms in Pittsburgh, PA, working at networking start-up FORE Systems/Marconi, and Panasys, which produced parallel file systems hardware and software.

Victor received his PhD in Computer Science from Purdue University (1994), Master's Degree from Purdue (1989), and B.S. in Computer Science from Calvin College (1987).

Victor's scholarly interests include best practices for teaching in colleges, college-level Active Learning techniques and materials (specifically, POGIL materials), leading middle-school and high-school computer science software clubs, creating curricula for clubs, using Computer Science and technology in Christian missions, and thinking and writing about the intersection of the Christian faith and Computer Science.

Victor has been a regular attendee at ACMS (although will miss ACMS this year due to being on sabbatical in Germany), and has regularly contributed presentations and papers, including the paper "How Will You Practice Virtue Without Skill?: Preparing Students to be Virtuous Computer Programmers."

Victor has been a reviewer for papers for SIGCSE (Special Interest Group for Computer Science Education), and CCSC-MW (Consortium of Computer Sciences at Colleges – Mid-west), and was the site host for CCSC-MW in 2018.

Victor lives in Grand Rapids, MI, is the husband of one, and father of three. For fun, he plays computer games and plays his euphonium in a community band. His family attends Sherman Street Christian Reformed Church, where he leads high-school Sunday School, and is a member of the Building Committee.

Valorie Zonnefeld

Valorie is an Associate Professor of Mathematics at Dordt College in Sioux Center, Iowa where she has been teaching since 2009 serving as an adjunct for the two years prior. Valorie received her BA in mathematics education from Dordt College in 1997, her MA in Curriculum and Instruction from Dordt in 2005 and an EdD from the University of South Dakota in Curriculum and Instruction in 2015. Her research interests include effective mathematics pedagogy, educational psychology with a focus on metacognition, and effective integration of faith in the mathematics classroom. Valorie is the Principal Investigator for a $1.2 million National Science Foundation grant to increase the number of K-12 STEM educators.

Before serving at Dordt, Val taught in middle and high schools in Iowa and California. At Dordt College Valorie teaches a variety of classes including developmental math, math for elementary teachers, methods of teaching math courses, and statistics. She has also served as department chair and as an Institutional Researcher for the college. In 2015 Valorie received Dordt's Excellence in Teaching award.

The ACMS has been a welcoming group to Valorie since she first attended in 2013 as rookie instructor learning how to transition from the world of K-12 to post-secondary education. Valorie has been a regular presenter at ACMS conferences and is thankful for the role that the ACMS plays in supporting Christians in the mathematical sciences. The collaboration with colleagues and new insights are a highlight of each ACMS conference she attends.

Valorie lives in Sioux Center, Iowa with her husband Ryan who is a professor in the Education Department at Dordt. Ryan and Val have 3 children, a son who is a freshman at Dordt, a daughter in high school and a daughter in middle school. They attend Covenant Christian Reformed church in Sioux Center and Valorie serves as President for the Booster Club at Unity Christian High School. In her free time, Val enjoys playing games, reading, and hanging out with friends and family.
